

**ABUL ISLAM, PE, FASCE**  
**N E D 1981**  
**Founder & President/CEO AI Engineers, Inc.**

Mr. Islam is the founder and President/CEO of AI Engineers, Inc., a 100 person consulting engineering/ construction management firm providing services in transportation, transit, bridges, highway, civil engineering and buildings including high performance building projects of various magnitudes. Currently the firm operates from its corporate facility in Middletown, Connecticut with regional offices in New York, NY, Boston, MA, Cranston, RI and Richmond, VA.

Mr. Islam has over 26 years of diversified experience in managing large and complex engineering projects. He leads project teams to attain top performance by focusing on managerial, financial and communication

skills. He is a strong advocate of sustainability in all infrastructure design, construction and maintenance projects. He believes in restoring vibrancy in our urban centers by investing in physical infrastructure,

including transportation/transit projects. He also believes in improving the quality of education from grades K-12 and community colleges for further economic development of our cities and towns.

Mr. Islam is also the owner/developer of a new "green" 286,000 SF office tower in Hartford, CT, seeking LLED Certification of Platinum according to the US Green Building Council Rating System. This iconic building is slated to begin construction in 2010. Design plans are underway for this structure which will be the first commercial/office building of its type in Connecticut. This building will also house AI Engineers corporate headquarters.
