

Rehan Jalil

Rehan Jalil is the President of WiChorus – A Tellabs Company. He led WiChorus as a founder and CEO through inception to its merger with Tellabs for about \$200 million in cash and stock. Previously, he was chief architect at Aperto Networks, where he led development of broadband wireless silicon and carrier-grade equipment. Rehan also worked for Sun Microsystems, where he contributed in development of one of the industry's earliest advanced multi-core multithreaded processor for throughput computing and graphics applications. At Siemens, he managed large-scale projects related to system-level design and implementation.

Rehan has more than 15 years of technical management and sales experience in telecommunications, networking and multi-core processors. He contributes to social entrepreneurship projects and is a charter member of OPEN Silicon Valley. He holds a Bachelor of electrical engineering from NED University and a Master of Science degree in electrical engineering from Purdue University and has 25 patents pending.

He has been named Ernst and Young Entrepreneur of the Year Finalist for 2010.
